

48V 110Ah Battery

Constructed using the latest lithium iron phosphate cells. These prismatic cells are the highest quality in a metal hard case. The battery is designed and developed in Australia and has an inbuilt Battery Management System (BMS).

At just under 40 kg, the LBS-48110-S15-CB160 is a high capacity 48V battery, perfect for electric vehicles where its power, capacity, and light weight add to the the performance of the vehicles.

External circuit breakers mean that the battery can be turned off for installation, storage, maintenance or other reasons. The battery has high amperage M8 threded terminals for robust electrical connections to the loads and chargers.

The strong aluminium outer enclosure delivers a safe, lightweight and powerful unit which is the perfect power source for your 48V systems.

SPECIFICATIONS

	LBS-481	10-S1
Chemistry		LiF€
Nominal Volta	age	48.0
Nominal Cap	acity	110
Nominal Ener	ſġy	5.3
Input Charge	Voltage	51.8
		52.5
100% SoC V	oltage	51.8
Low Voltage	cut-off	40.0
Charge Curre	ent	100
		110
Discharge Cu	irrent	200
		480
Operating Te	mp.	See
Weight		39.5
Packaged We	eight	40.0
Life at 80% D	юD	200
Life at 50% D	юD	500
Parallel Capa		Yes
Series Capab	le	No
Size	L	360

FEATURES

- Strong, compact aluminium enclosure \checkmark
- Internal BMS ~
- \checkmark Over/Under voltage protection

H₁

H₂

- \checkmark Overcurrent protection
- ✓ Short circuit protection
- M8 Threaded Hole Terminals \checkmark
- Circuit Breakers (Positive & Negative) \checkmark
- Designed and assembled in Australia ~

48V 110Ah Battery

TEMPERATURE NOTICE

At temperatures above 60°C, the battery must NOT be operated (charge or loads). Please move the battery into a cooler environment.

At temperatures above 45°C, the battery must NOT be charged. Battery lifespan is reduced in these conditions.

Maintain your battery within this range for optimum battery lifespan and performance.

At temperatures below 0°C, the battery must NOT be charged. Battery performance is reduced in these conditions.

At temperatures below -20°C, the battery must NOT be operated (charge or loads). Please move the battery into a warmer environment.
