

LBS-12300-HP-BIC

12V 300Ah High Power (HP) BIC

DESCRIPTION

Constructed using the latest lithium iron phosphate prismatic cells. The HP battery has an inbuilt solid-state Battery Management System (BMS) which offers sophisticated internal management, balancing and diagnostics.

The battery can power larger loads up to 200A of continuous discharge and 500A surge. It can also be charged at up to 150A, replenishing the battery in ~2 hours. These high-power units can be placed into parallel for capacity increase and current increases to power massive loads including air-conditions.

This BIC model has a convenient built-in solar controller for up to 800W unregulated solar input via the red Anderson. It also can receive a DC input on the blue Anderson and an external AC charger on the black Anderson. All inputs have individual volt meters for monitoring.
